

TRIM/STOW RESET PROCEDURE

Step 1. Press and hold the POWER button located at the mounting base to turn power OFF (green LED light will turn off).

Step 2. Press the POWER button until the green “*System Ready*” LED light illuminates.

Step 3. Wait three (3) seconds.

Step 4. Press the POWER button three (3) times within a two (2) second period.

Step 5. Red and green LED lights will flash continuously and the Ulterra will go through the following automated sequence:

- Motor will position itself into the proper orientation.
- Motor will automatically trim up to the mounting base and trim down approximately six (6) inches.
- The flashing red LED light will turn off, and the flashing green LED light will become solid green.

NOTE: If the lower unit of the motor is trimmed within six (6) inches of the mounting base and the boat hull is obstructing the motor's turning radius, manually turn the head of the motor so that the lower unit is perpendicular to the motor ramps prior to beginning this procedure.
